Khandmaa S., Director of the Center for Technology

Abstract The objective of the present study was to find regular patterns in processing of complex copper-molybdenum ore by flotation and bio-hydrometallurgical method and to choose application conditions for combination of the methods. As a result of the studies, the indexes and parameters of the process were related with the grain size of the products, acidity of the medium, leaching duration, and temperature and density of the pulp slurry. The recommended optimum conditions for middling products are pH range from 10.2 to 10.5 at 72 to 75% content of mineral particles -74 µm in size. The best performance of bacterium-acid leaching is reached at the concurrent feed of biomass and acid at the pulp slurry density of 50% and the medium temperature of 32-36°C. The developed combination scheme and dressing technology for middling products of copper-molybdenum ore bulk flotation includes ore grinding, flotation of sulfide minerals, bacterium leaching of flotation tailings, liquid-phase extraction of dissolved copper and electrolysis of re-extraction column effluents.

Keywords Copper-molybdenum ore, flotation, processing of middling products, sorption extraction

Abstract

The objective of the present study was to find regular patterns in processing of complex copper-molybdenum ore by flotation and bio-hydrometallurgical method and to choose application conditions for combination of the methods. As a result of the studies, the indexes and parameters of acid and bio-hydrometallurgical leaching of middling products were related with the grain size of the products, acidity of the medium, leaching duration, and temperature and density of the pulp slurry. The recommended optimum conditions for middling products are pH range from 10.2 to 10.5 at 72 to 75% content of mineral particles -74 µm in size. The best performance of bacterium-acid leaching is reached at the concurrent feed of biomass and acid at the pulp slurry density of 50% and the medium temperature of 32-36°C. The developed combination scheme and dressing technology for middling products of copper-molybdenum ore bulk flotation includes ore grinding, flotation of sulfide minerals, bacterium leaching of flotation tailings, liquid-phase extraction of dissolved copper and electrolysis of re-extraction column effluents.

Проанализировать и оставить все статьи содержащие название вашей организации

[illegible]

В зависимости от результатов проверки либо подкорректируйте поисковый запрос (напр. уточните поиск, удалив организацию с совпадающими поисковыми терминами) либо сразу подготовьте письмо с запросом на корректировку.

В письме на корректировку укажите а) какой существующий профиль надо откорректировать, название и Affiliation ID (если профиля нет – то укажите что надо создать профиль с названием б) список профилей AF-ID, если есть, которые надо объединить/присоединить к вашему профилю; в) список статей авторов вашей организации (со ссылкой на список этих статей в Scopus), ошибочно прикрепленные к профилю другой организации, которые должны быть прикреплены к вашему профилю

Письмо отправляйте на адрес affiliationfeedback@scopus.com ; с копией g.yakshonak@elsevier.com и v.sobolev@elsevier.com

The screenshot displays the Scopus Affiliation Identifier interface. On the left, the profile for 'Astrakhan State Medical Academy' is shown, including its address (Baku Houses, 121, Astrakhan) and Affiliation ID (60009283). A red box highlights the organization name. The main area shows search results for the query 'AFFL (astra*an AND med*)', displaying 209 document results. The results table lists documents with their titles, authors, and counts. For example, the first result is 'Isolation of two strains of West Nile virus during an outbreak in southern Russia, 1999' by Lvov, D.K., Butenko, A.M., Gromashevsky, V.L., et al., published in 2000 in 'Emerging Infectious Diseases'.

Refine	Document Title	Author Name	Year	Document Type	Count
☒ Isolation of two strains of West Nile virus during an outbreak in southern Russia, 1999	Lvov, D.K., Butenko, A.M., Gromashevsky, V.L., (...), Shishkina, E.O., Skvortsova, T.M.	2000	Emerging Infectious Diseases	71	
☒ Effect of baclofen on the characteristics of cellular immune response	Tyurenkov, I.N., Samotruueva, M.A., Ovcharova, A.N.	2008	Ekspperimental'naya i Klinicheskaya Farmakologiya	3	

Пример письма-запроса на корректировку

Невнимательность при подготовке и подаче статьи к публикации приводит к отсутствию информации в оригинале, а значит и в Scopus ... что уменьшает показатели ученого/организации

Methods of estimation of effect of artificial base on the magnitude and spectrum of seismic oscillations

Il'ichev, V.A., Kurdyuk, A.K., Likhovtsev, V.M.

Abstract

The paper deals with the problem of estimation of artificial foundation base effects on intensity and spectrum of seismic loads. The numerical technique giving an opportunity to determine the seismic loads basing on the results of the finite element studies, is suggested. It is shown that artificial ground base construction provides for considerable decrease of seismic effects on building and structures. The minimum value of seismic effect is obtained for the artificial base in the form of soil cushion with the base to height ratio equal to 1.5. The seismic reaction is reduced twice when using the artificial base with chemical fixation.
